

**Leading supplier of
Big Bags and flexible
packaging in Europe.**

MORE THAN 65 YEARS SUPPLYING FLEXIBLE PACKAGING MATERIAL

Interjute has been producing and selling flexible packaging for decades; we are leaders in offering comprehensive and intelligent storage solutions to our clients. We are the main **supplier of Big bags** and packaging solutions and we have a professional and experienced team that ensures the highest quality and reliability in our products.

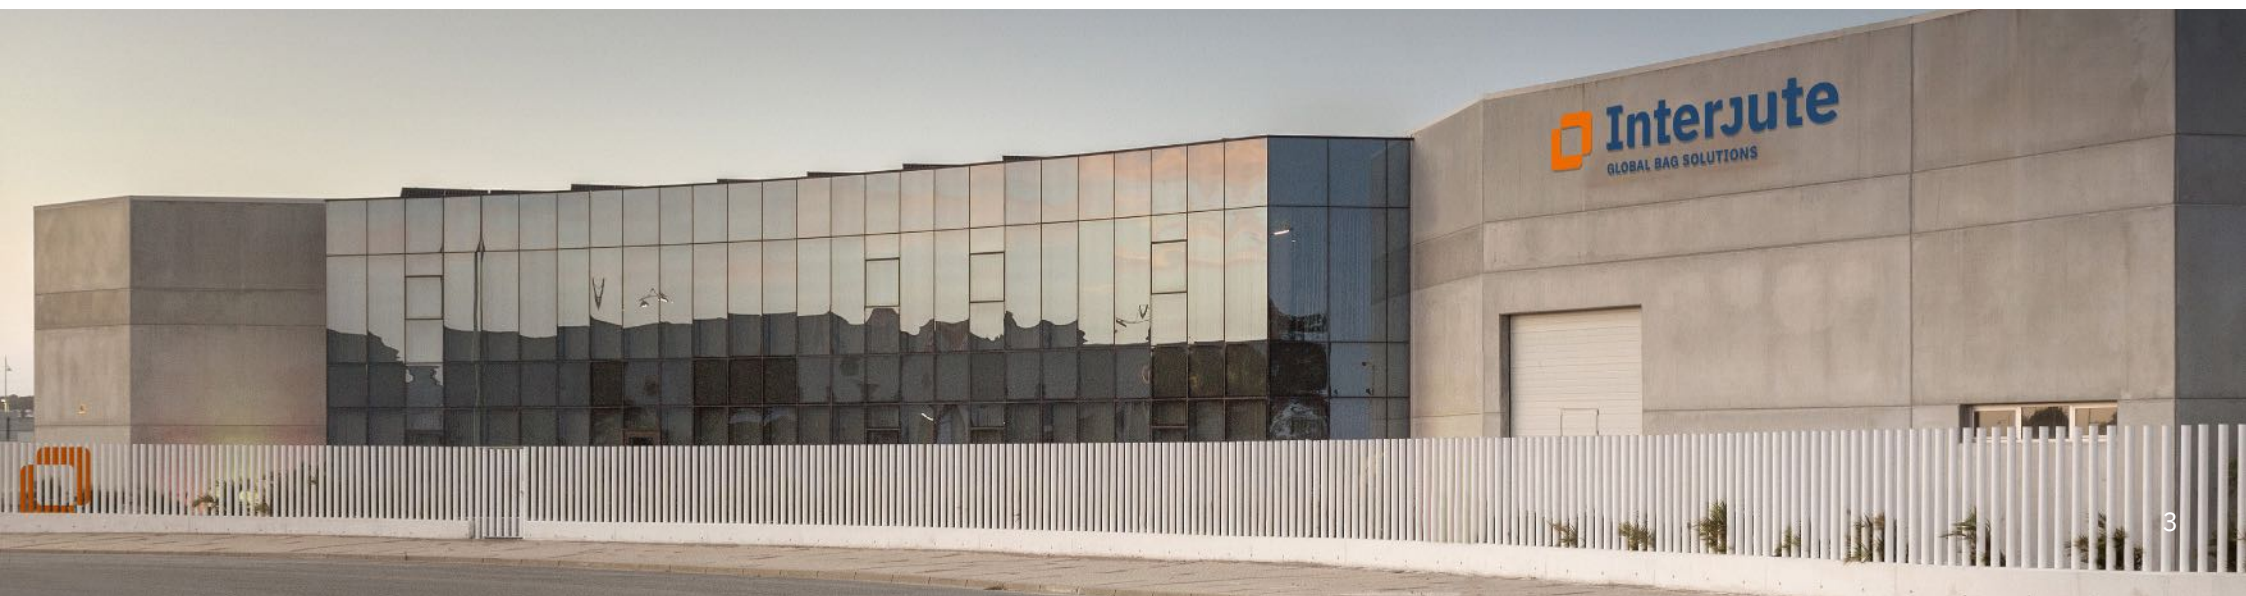

Thanks to Interjute's efforts and know-how, we have experienced rapid business **growth and international expansion**. Due to this, our products are currently leaders in Europe for their quality, flexibility and resistance.

At Interjute we seek excellence in what we do, offering the highest quality flexible packaging solutions that satisfy our customer's needs.

Our work involves **innovation and evolution** in packaging, so we try to anticipate future consumer setbacks in the manufacturing of our products, foreseeing any storage problems they may have.

We have an international purpose: we export our products throughout Europe, Africa and America with an annual production of 25 million

units of woven bags, 2.5 million units of 4-handle Big Bag and 1.5 million units of 1-handle Big Bag. Our manufacturing plants are located mainly in **Spain, India and Romania**. By locating our factories in different countries, we can ensure a complete supply of our products to our clients and meet deadlines and costs.

WE SEEK EXCELLENCE BY OFFERING SOLUTIONS WITH THE HIGHEST QUALITY STANDARDS ON THE MARKET

Interjute is a **leader in the sector**, and we have achieved this thanks to a deep-rooted work philosophy that makes us who we are today.

Taking our production and sales processes seriously has made us a reliable company for our clients. Working with the **highest quality standards**, by certifying a **flexible, resistant and durable** product, helps us being trusted by the consumers whose packaging needs we solve.

Furthermore, we could not be leaders without our **human team**. We have

highly qualified professionals, who know the sector perfectly and who train and evolve day by day in order to **offer specialized and personalized** advice to each of our clients.

Our experience has paved the way for **internationalization** together with extensive territorial and business expansion. Therefore, our products are global and we offer our innovative, high-quality flexible packaging solutions around the world.

W

WE ARE COMMITTED TO CONTINUE GROWING, BEING PRESENT AROUND THE WORLD

Interjute was founded in March 1958 in Holland, as a supplier of reused jute bags. This business vision, favored by the good economic times that benefited the increase in exports, soon turned Interjute into one of the largest suppliers in Europe.

Decade of the 80's

Since 2001, Interjute has stabilized, due to its continuous growth and geostrategic position in Spain, by leading new markets in the Iberian Peninsula, with its headquarters in Cádiz, and also by becoming the main supplier of plastic packaging for Spain and Portugal.

Its extensive history, experience and strong territorial expansion make Interjute a global and consolidated company in the sector today, with a deep-rooted work philosophy, that has managed to evolve in its more than 70 years of experience in the global flexible packaging market.

1 March 1958

Interjute has always had an innovative spirit and has known how to focus on the needs of our clients. In the 1980s, with the rise of polypropylene as the ideal material for making bags, Interjute positioned itself as one of the leading companies in the sector. Due to its rapid adaptation to the change from jute to polypropylene, it established itself as one of the most important packaging suppliers, not only in Europe but also in Africa.

**WE HAVE MAINTAINED THE
SAME VALUES SINCE OUR
BEGINNING AND THEY HAVE
MADE US GREAT**

Quality

The quality of our products is one of our added values: they are flexible, resistant and very durable. We stand out for using top quality materials to make our products, with certified quality processes and standards, which make them excellent, a point highly valued by our clients.

Services

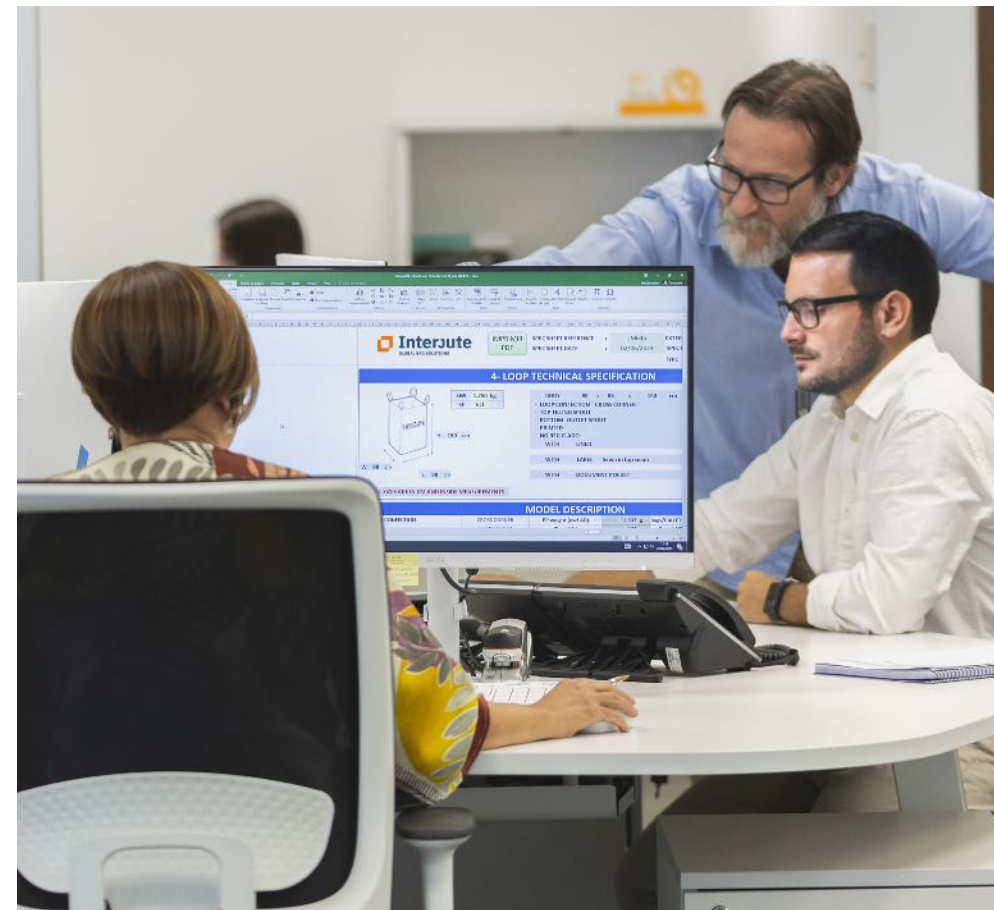

We push ourselves to provide the best services to our clients; we offer a personal, professional and open-hearted customer service. We achieve this thanks to a human team, aligned with the brand philosophy, which is trained day by day to offer extraordinary commercial relationships to our clients.

Know-how

At Interjute we have years of experience in the production and sale of packaging solutions internationally. This know-how, which we develop, manage and grow internally, means that we have market knowledge that anticipates the present and future needs of our clients.

Global vision

Interjute has a global vision, which helps us achieve a solvent international supply network that ensures the complete supply of our products to all our clients, making us the first choice of our current and future clients, wherever they are.

OUR PRODUCTS

PRODUCT RANGE

Big-Bag

1-Loop Big-Bag

Woven Bag

BOPP Bag

Geotextile / Groundcover

Container Liner

INDUSTRIES WE WORK IN

Animal nutrition

Agriculture

The food sector

Fertilizers

Chemical products

Plastics and derivatives

Recycling

Construction

Mining

We supply and manufacture a wide range of flexible intermediate bulk containers (FIBC) and polypropylene woven bags. Thanks to our production facilities in Asia, Eastern Europe and our production in Spain, we can offer excellent value for money for all FIBC and woven bags specifications.

Product range

BIG BAG

4-LOOP

They are made of polypropylene fabric and with four loops; it is a custom-made product with different options, they can be made of unplasticized or plasticized fabric, with anti-leak seams, printed on either side, etc. The options are multiple and depend on the requirements of each client. This type of packaging is ideal for the storage and transportation of bulk product.

It should be noted that our production plants are capable of manufacturing under BRC standards, adapting the packaging to the most demanding quality requirements.

KEY INDUSTRIES:

Product range

BIG BAG

4-LOOP VENTILATED

This type of big bag is also manufactured with four loops, but unlike the common big bag, the fabric contains a series of ventilation lines that make this container the perfect packaging for carrying fresh products and guaranteeing their quality and preservation thanks to the ventilated parts of the big bag. It is breathable and very resistant, which ensures air circulation on all sides and ideal ventilation for carrying and protecting horticultural products.

KEY INDUSTRIES:

Product range

BIG BAG

4-LOOP CIRCULAR

This big bag is made of tubular-shaped polypropylene fabric, it does not have vertical seams and therefore has four loops that are sewn into 8 reinforced fabric bands, distributing the tension evenly. It can also be manufactured with multiple options like the rest of the big bags.

KEY INDUSTRIES:

Product range

BIG BAG

Q-BAGS

Q-bags are a type of flexible packaging that contain interior panels sewn to the side walls of the big bag. The purpose of these interior panels is to maintain the cubic shape of the container when it is filled, thus avoiding the elongation of the fabric and occupying a smaller volume, allowing a more uniform stacking and favoring the storage of the packaged products.

KEY INDUSTRIES:

Product range

BIG BAG

1-LOOP BIG BAG

Flexible packaging with a lifting point, which is usually manufactured including an inner polyethylene bag. These Big Bags with one loop are specific for packaging powder or grain raw materials, such as fertilizers, cement, etc. The 1-loop big bag can be filled and it has a loop handle, which makes it easy to carry more than one at a time. This product is custom-made according to the needs required by the client.

KEY INDUSTRIES:

Product range

WOVEN BAGS

STANDARD

Woven bags are a versatile container made of polypropylene fabric, with multiple design options. Our production department can adapt this packaging to the needs of each client, always depending on the requirements of the product being packaged and packaging facilities. Raffia bags are ideal for packaging different types of products such as fodder, rice, sugar, seeds, fertilizer, chemicals, etc.

KEY INDUSTRIES:

Product range

WOVEN BAGS

LAMINATED

Plasticized polypropylene woven bags have a polyethylene sheet attached to the body of the bag to make it waterproof and less breathable. Lamination can be internal or external and helps the fabric not to fray, makes handling more comfortable, and it is ideal for use in production lines with automated packaging machines.

KEY INDUSTRIES:

Product range

WOVEN BAGS

BOPP BAGS

BOPP bags are made from a type of plastic (biaxially oriented polypropylene), which offers an excellent barrier against moisture and oxygen, as well as contamination and harmful chemicals. For this reason, it is considered a highly appreciated material for the packaging of food or other types of products, as it contributes to extending its useful life. It is perfect for printing, as it allows the use of water-based and solvent-based inks, with photographic quality.

KEY INDUSTRIES:

Product range

MESH

GROUND COVER

The ground cover mesh or anti-weed mesh has the function of covering the ground under a greenhouse or facility to prevent the growth of plants other than the crop, helping to keep the area cleaner. In addition, it prevents the growth of parasites and reduces the incidence of soil pathogens. The white anti-weed meshes allow light to be reflected towards the leaves of your crop plants, resulting in a decrease in the internal heat of the greenhouse. On the other hand, the black anti-weed meshes, thanks to their coloring, help increase the temperature within the crop and prevent the growth of algae.

KEY INDUSTRIES:

Product range

CONTAINER LINER

CONTAINER LINER

It is a packaging that acts as an internal cover for a cargo container and is used for bulk goods. It is available for both 20" and 40" containers and can be adapted to the customer's needs, including the loading and exit openings. Container Liners are supplied with everything necessary for installation: carabiners, ropes and steel bars. This type of packaging maximizes container use by allowing the transportation of return cargoes of different nature.
